LIGHTSPEED®

COMPILLENNIA, LLC

LIGHTSPEED® Catamaran

Compmillennia's **LIGHTSPEED®** Catamaran is a sleek center console with a close to 70mph top speed fully outfitted for offshore fishing or excursions. Its innovative design and advance composite construction make it incredibly strong and lightweight.

An extremely efficient hull design also helps with the boat's superior fuel economy.

Compmillennia's mission is to manufacturer a cutting edge twin engine catamaran which achieves speeds comparable to larger triple and quad engine V-bottom center console boats but with superior fuel economy. Mission accomplished with **LIGHTSPEED®**

LIGHTSPEED® Catamaran uses less engine horsepower to push it's lighter weight double hull through the water. Less water displacement equals better fuel economy, lower costs to run on the water and tow on the road.

LIGHTSPEED® catamaran's trademark smooth ride is achieved with less weight, greater fuel economy and less horsepower.

Offering a wide range of standard features, Compmillennia will help you enhance your **LIGHTSPEED®** with custom options and electronics for you, your family and guests to enjoy on the water.
